

CARTRIDGE HEATER FEATURES

An Economical and Reliable Cartridge Heater, Used in Applications Requiring Lower Operating Temperatures and Watt Densities

The standard termination for Low-Density Cartridge Heaters is Type F, consisting of 10" (254 mm) internally connected flexible lead wires with high temperature insulation, UL approved for 300 Volt or 600 Volt service and temperature rated to 482°F (250°C).

Note: To meet the requirements of your application we offer over 40 standard termination styles to select from that will solve many of the most common application problems. See pages 2-39 through 2-60.

Ceramic end cap protects the cartridge internally from outside contamination.

Resistance wire and lead wires are mechanically spliced with heavy wall nickel connectors for a positive electrical connection.

Helically wound Nickel-Chrome resistance wire is evenly stretched and strung through ceramic insulators.

Alloy 304 Stainless Steel is used to provide high temperature strength, good thermal conductivity and resistance to oxidation up to 1200°F (650°C). Alloy 304 is a Nickel-Chromium Stainless Steel. For immersion heating of corrosive solutions consult Tempco.

Specially selected grain size high purity Magnesium Oxide (MgO) is used to fill all remaining space inside the ceramic insulator, thus increasing thermal conductivity, dielectric strength and heater life.

Sheath is roll crimped over a 304 Stainless Steel end disc. A mica spacer electrically insulates the heater core from the end disc. This style end seal is not moisture proof.

Tempco Low-Density Cartridge Heaters are an excellent,

cost effective choice without compromising quality for

Agency Approvals

Low Density Cartridge Heaters are UL recognized and CSA certified in many design variations under UL File Number E65652 and CSA File Number 043099.

If you require UL and/or CSA Agency Approval, please specify when ordering.

Original Equipment Manufacturers (OEMs) consuming large quantities of cartridge heaters for their equipment.

Typical Applications

- → Heat Sealing Equipment
- **→** Laminating Equipment
- → Packaging Equipment
- → Labeling Machines
- **→** Molds and Dies
- **→** Food Processing
- **→** Refrigeration
- → Shoe Machinery
- **↔** Glue Guns
- → Wax Pots
- Heating Liquids
- **→** Heating Gases

Low-Density Cartridge Heater Specifications

Standard Specifications and Tolerances of Low Density Cartridge Heaters. If tighter tolerances are required consult Tempco.

PERFORMANCE RATINGS

Maximum Temperature: 1200°F (650°C)

Maximum Watt Density: 20-45 W/in² (3.1-7.0 W/cm²) depending on heater size and operating temperature.

Note: Part Numbers above are for Low-Density Cartridge Heaters terminated with Type F flexible leads, 10" long.

Low-Density Cartridge Heaters are made-to-order only. *Standard lead time is 3 weeks*. See pages 2-39 through 2-57 for other terminations.

Ordering Information

Catalog Heaters

Order by Catalog Part Number from the Standard Sizes and Ratings List on the preceding pages. Note that Part Numbers shown are for heaters with Type F Termination (10" leads).

Available Terminations and Optional Features can be found on pages 2-39 through 2-60.

Custom Engineered/Manufactured Heaters

Because an electric heater can be very application specific, for sizes and ratings not listed, **TEMPCO** will design and manufacture a Low-Density Cartridge Heater to meet your requirements. **Standard lead time is 3 weeks.**

Please Specify the following:

- ☐ Diameter ☐ Termination types (see pages 2-39 through 2-51)
- ☐ Length ☐ Options/Special Features (see pages 2-52 through 2-60)
- ☐ Wattage ☐ Lead Length ☐ Application Type
- ☐ Voltage ☐ Cable/Braid length ☐ Operating Temperature

Standard Terminations

Tempco Offers Innovative Cartridge Heater Terminations Focused on Providing Maximum Performance Under a Diverse Segment of Demanding Applications

Cartridge Heater Terminations Can be Elusive to Define and Are Often Overlooked

To ensure maximum efficiency and reliable cartridge heater service, evaluate your existing operating conditions and proceed to select the best suited termination(s) for your application.

Failure to evaluate the operating conditions and the environment of a cartridge heater application and/or improper termination selection will compromise the operating reliability and functional life of the cartridge heater, resulting in costly machine downtime and loss of revenue due to lack of productivity.

The synergy between the cartridge heater termination and the application will result in reduced operating cost, increased productivity, optimized performance and improved customer satisfaction.

Take Advantage of Tempco's Innovative Cartridge Heater Terminations.

We offer a selection of over 40 standard terminations specifically designed to address the operating requirements of a multitude of diverse applications requiring protection against the following conditions:

- **→** Abrasion
- **→** Contamination

• Flexing

→ Moisture Resistance → High Temperatures

In addition, there are many cartridge heater adaptations to facilitate their use:

- → Double-End Powerleads
- **→** Mounting Flanges
- **→** Locating Ring or Bushings
- → Pull Straps
- → NPT or Bulkhead Fittings
- → Built-In Thermocouples & Thermostats
- **→** Electrical Boxes

Refer to pages 2-39 through 2-60 for complete specifications and details on all available terminations and options.

A Wise Man Once Said . . .

"A Cartridge Heater is Only As Good as the Termination that Powers It."

Standard Termination — HDC and HDM Hi-Density Cartridge Heaters

Type N External Pins with Leads

Available on HDC and HDM cartridge heaters

Flexible stranded lead wires have fiberglass insulation and are connected to 1-1/4" (32 mm) long solid conductors. Silicone rubber coated fiberglass sleeving insulates the pin/lead wire connection.

- Nominal 3/8" unheated section at the lead end is required.
- > Standard lead wire temperature rating: 482°F (250°C)
- ➤ Silicone rubber coated fiberglass sleeving temperature rating: 392°F (200°C)
- > Standard 10" (254 mm) leads. Specify longer leads.

Standard Termination — LDC Low-Density Cartridge Heaters

Type F Internally Connected Flexible Leads Available on HDC HDM and LDC Cartridge Heat

Available on HDC, HDM and LDC Cartridge Heaters

The fiberglass lead wires are internally connected to the terminal pins. This lead termination provides flexibility, permitting the lead wires to be sharply bent as they exit the heater.

- ➤ Minimum 3/8" up to 1" unheated section at the lead end is required.
- ➤ Standard lead wire temperature rating for HDC and HDM cartridge heaters is 842°F (450°C)
- Standard lead wire temperature rating for LDC cartridge heaters is 482°F (250°C)
- ➤ Standard 10" (254 mm) leads. Specify longer leads. For HDC & HDM heaters, leads longer than 60" require a splice.

Note: The standard termination for Tempco's line of Miniature Hi-Density Cartridge Heaters is Type M3 - Teflon® End Plug Seal. See pages 2-10 and 2-11 for complete Minature Cartridge heater details.

Terminations

Cartridge Heater — Moisture Resistant Terminations

Insertion Lenath Minimum **Unheated Section**

Type M1 Polyolefin Liquid Barrier

Available on HDC, HDM, and LDC cartridge heaters

A liquid barrier used for low temperature applications primarily in refrigeration or food service applications. The seal bonds to both the heater and the leads.

- ➤ Minimum 1" unheated section at the lead end is required.
- Three conductor SJO type cord.
- > Available only in certain diameters. Heaters smaller than 1/2" diameter require an adapter.
- > Standard 10" (254 mm) leads. Specify longer leads.

Type M2 Potted End Seal

Available on HDC, HDM and LDC cartridge heaters

Potted end seals help to protect the heater from moisture or contamination from plastic material, cleaning solvents, or oils. The bottom end disc seal is welded in.

- Cement potting with silicone varnish. Fiberglass lead wires externally connected.
 - ➤ Cement potting temperature rating: 1000°F (538°C)
 - > Standard lead wire temperature rating: 482°F (250°C)

M2B Silicone rubber potting. Silicone rubber lead wires internally connected.

- ➤ Silicone rubber potting temperature rating: 392°F (200°C)
- > Standard lead wire temperature rating: 392°F (200°C)

M2C High temperature epoxy potting. Teflon[®] lead wires internally connected.

- ➤ High temp. epoxy potting temp. rating: 450°F (232°C)
- ➤ Standard lead wire temperature rating: 392°F (200°C)

M2D Low temperature epoxy potting. Teflon® lead wires internally connected.

- ➤ Low temp. epoxy potting temp. rating: 266°F (130°C), UL rated to 194°F (90°C)
- ➤ Standard lead wire temperature rating: 392°F (200°C)

M2E Cement potting with silicone varnish. Fiberglass lead wires internally connected.

- ➤ Cement potting temperature rating: 1000°F (538°C)
- > Standard lead wire temperature rating: 482°F (250°C)
- Minimum of 3/8" up to 1" unheated section at the lead end is required.
- > Standard 10" (254 mm) leads. Specify longer leads.

Type M3 Teflon® End Plug Seal

Available on HDC and HDM cartridge heaters

A moisture resistant Teflon® seal that is swaged in during the manufacturing process with Teflon® insulated lead wire.

- ➤ Minimum 3/8" up to 1" unheated section at the lead end is required.
- > Teflon[®] seal temperature rating: 392°F (200°C)
- > Standard lead wire temperature rating: 392°F (200°C)
- Standard 10" (254 mm) leads. Specify longer leads. Leads longer than 60" require a splice.

TYPE M2A

TYPE M2B, M2C, M2D and M2E

Terminations

Cartridge Heater — Moisture Resistant Terminations

Type SA Sealed Corrugated Armor Cable

Available on 1/2" Diameter and Larger HDC, HDM and LDC cartridge heaters

A liquid-proof stainless steel corrugated metal hose is silver brazed to the end of the cartridge heater. The end disc of the heater is also welded or brazed. This termination provides a positive seal against moisture and contamination entering the heater.

- Minimum 3/8" up to 1" unheated section at the lead end is required.
- Standard fiberglass lead wire temperature rating HDC and HDM: 842°F (450°C), LDC: 482°F (250°C)
- Standard 10" (254 mm) cable over 12" (305 mm) leads. Specify longer leads or cable.

Cartridge Heater — Flexible Spring Abrasion Resistant Terminations

Type S1 Flexible Spring

Available on HDC, HDM, and LDC cartridge heaters.

The leads are reinforced with a steel spring for applications with extreme flexing. The spring is mechanically fastened or silver brazed.

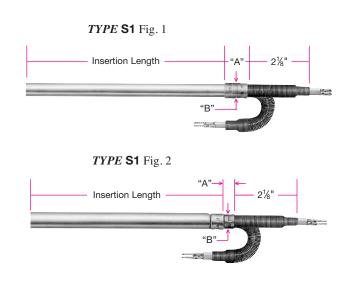

\$1A Mechanically fastened spring.

S1B Silver brazed spring.

- ➤ Minimum 3/8" up to 1" unheated section at the lead end is required.
- > Standard fiberglass lead wire temperature rating HDC and HDM: 842°F (450°C), LDC: 482°F (250°C)
- > Standard 10" (254 mm) leads. Specify longer leads.

Abrasion Resistant Terminations

Cartridge Heater — Flexible Braid Abrasion Resistant Terminations

TYPE W Fig. 1 Insertion Length "A"

TYPE W Fig. 2 Insertion Length

Available through the Hi-Density Cartridge Heater Terminator Program

for 2nd or 3rd Day Shipping

Type W Wire Braided Leads

Available on HDC, HDM, and LDC cartridge heaters

Stainless steel braid over fiberglass leads offers sharp bending not possible with armor cable, as well as abrasion protection.

- Minimum 3/8" up to 1" unheated section at the lead end is required.
- Standard lead wire temperature rating HDC and HDM: 842°F (450°C), LDC: 482°F (250°C)
- ➤ Standard 10" (254 mm) braid over 12" (305 mm) leads. Specify longer braid/leads.

Type W3 Swaged-In Wire Braided Leads

Available on HDC and HDM cartridge heaters

Stainless steel braid over fiberglass leads offers sharp bending not possible with armor cable, as well as abrasion protection. In addition, Type W3 offers contamination resistance due to the Teflon® seal required for holding the wire braid.

- ➤ Minimum 3/8" up to 1" unheated section at the lead end is required.
- ➤ Teflon® Seal temperature rating: 392°F (200°C)
- > Standard lead wire temperature rating: 842°F (450°C)
- ➤ Standard 10" (254 mm) braid over 12" (305 mm) leads. Specify longer braid/leads.

Abrasion Resistant Terminations

Cartridge Heater — Armor Cable Abrasion Resistant Terminations

Type CS Straight Armor Cable Directly Attached to Sheath

Available on HDC, HDM, and LDC cartridge heaters

The armor cable is directly attached to the cartridge heater, eliminating the coupling, to maintain an overall diameter equal to or smaller than the cartridge diameter.

CSA Galvanized armor cable – minimum diameter: 5/16"

CSB Stainless steel armor cable – minimum diameter: 5/16"

- ➤ Minimum 3/8" up to 1" unheated section at the lead end is required.
- ➤ Heaters with an OD of 3/4" or larger require reducing diameter washer
- Standard fiberglass lead wire temperature rating HDC and HDM: 842°F (450°C), LDC: 482°F (250°C)
- Standard 10" (254 mm) cable over 12" (305 mm) leads. Specify longer leads or cable.

Available on HDC, HDM, or LDC cartridge heaters

Armor cable provides the maximum in protection for abrasive, jagged environments. The coupling between the cartridge and the armor cable is mechanically fastened or silver brazed.

C1A Galvanized armor cable, mechanically fastened

C1B Stainless steel armor cable, mechanically fastened

➤ Standard fiberglass lead wire temperature rating 482°F (250°C)

C1C Galvanized armor cable, silver brazed

C1D Stainless steel armor cable, silver brazed

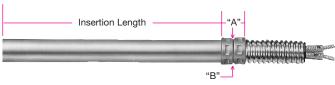

- Standard fiberglass lead wire temperature rating HDC and HDM: 842°F (450°C), LDC: 482°F (250°C)
- ➤ Minimum 3/8" up to 1" unheated section at the lead end is required.
- Standard 10" (254 mm) cable over 12" (305 mm) leads. Specify longer leads or cable.

Type R2 Right-Angle Leads

Available on HDC, HDM, and LDC cartridge heaters

This termination is used when space is limited. Not suitable for abrasive environments. The plain leads are internally connected and offer flexibility. Various lead end finishes are available as listed below:

R2A Cement potting, no lead end disc

Cement potting temperature rating: 1000°F (538°C)

➤ Standard fiberglass lead wire temperature rating: 482°F (250°C)

R2B Cement potting, welded lead end disc

Cement potting temperature rating: 1000°F (538°C)

➤ Standard fiberglass lead wire temperature rating: 482°F (250°C)

R2C Silicone rubber potting, welded lead end disc

➤ Silicone Rubber potting temperature rating: 392°F (200°C)

➤ Standard silicone rubber lead wire temperature rating: 392°F (200°C)

R2D High temperature epoxy potting, welded lead end disc

► High Temperature epoxy potting temperature rating: 450°F (232°C)

Standard Teflon® lead wire temperature rating: 392°F (200°C)

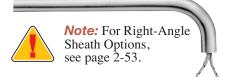

R2E Low temperature epoxy potting, welded lead end disc

► Low Temperature epoxy potting temperature rating: 266°F (130°C)

➤ Standard Teflon® lead wire temperature rating: 392°F (200°C)

- ➤ Minimum 3/8" up to 1" unheated section at the lead end is required.
- **Standard** 10" (254 mm) leads. Specify other lead lengths.

R2A and R2B are available through the

Right-Angle Terminations

Cartridge Heater — Flexible Braid Abrasion Resistant Right-Angle Terminations

Type W1 Right-Angle Wire Braided Leads

Available on HDC, HDM, and LDC cartridge heaters

Stainless steel braid over fiberglass leads for abrasion protection, mechanically crimped to the cartridge sheath at 90°. Wire braid offers extreme flexibility not possible with armor cable. Various lead end finishes are available as listed below.

W1A Cement potting and silicone varnish, no lead end disc.

- ➤ Cement potting temperature rating: 1000°F (538°C)
- > Standard lead wire temperature rating: 482°F (250°C)

W1B Welded lead end disc.

- ➤ Cement potting temperature rating: 1000°F (538°C)
- ➤ Standard lead wire temperature rating: 482°F (250°C)
- Minimum 3/8" up to 1" unheated section at the lead end is required.
- > Standard 10" (254 mm) braid over 12" (305 mm) leads. Specify longer braid or leads.

Cartridge Heater — Armor Cable Abrasion Resistant Right-Angle Terminations

Type C2 Right-Angle Armor Cable with Copper Elbow Available on HDC, HDM, and LDC cartridge heaters

Armor cable provides the maximum in protection for abrasive, jagged environments. The copper elbow between the cartridge and the armor cable is mechanically fastened or silver brazed.

- **C2A** Galvanized armor cable, mechanically fastened
- **C2B** Stainless steel armor cable, mechanically fastened
- **C2C** Galvanized armor cable, silver brazed
- **C2D** Stainless steel armor cable, silver brazed
- ➤ Minimum 3/8" up to 1" unheated section at the lead end is required.
- ➤ Standard fiberglass lead wire temperature rating HDC and HDM: 842°F (450°C), LDC: 482°F (250°C)
- > Standard 10" (254 mm) cable over 12" (305 mm) leads. Specify longer cable or leads.

Type C3 Right-Angle Armor Cable

Available on HDC, HDM, and LDC cartridge heaters

Use this termination when space is limited and maximum protection is required. The armor cable is tack welded or silver brazed to the cartridge sheath at 90° . The sheath extension is potted with cement. Various lead end finishes are available as listed below.

- **C3A** Cement potting and silicone varnish with no lead end disc, galvanized cable
- **C3B** Cement potting and silicone varnish with no lead end disc, stainless steel cable
- **C3C** Welded lead end disc, with galvanized cable
- **C3D** Welded lead end disc, with stainless steel cable
- ➤ Minimum 3/8" up to 1" unheated section at the lead end is required.
- Cement potting temperature rating: 1000°F (538°C) Standard fiberglass lead wire temperature rating: 482°F (250°C)
- ➤ Standard 10" (254 mm) armor cable over 12" (305 mm) leads. Specify longer cable or leads.

High Temperature Terminations

Cartridge Heater — Screw Terminations

Type T1 Screw Terminals

Available on LDC type cartridge heaters only

For use with leads, crimp terminals, or bus bars. Includes washers and nuts.

- ➤ Minimum 1/2" unheated section at the lead end is required.
- ➤ Diameters available: 3/4", 7/8", 15/16", 1", and 1-1/4".
- **Standard:** screw #6-32 \times 3/4" long

| | Diameter | in | 3/4 | 7/8 | 15/16 | 1 | 1-1/4 |
|--|---------------|----|-------|-------|-------|-------|-------|
| | | mm | 19.05 | 22.23 | 23.81 | 25.40 | 31.75 |
| | "A" Dimension | in | 3/8 | 7/16 | 7/16 | 1/2 | 1/2 |
| | | mm | 9.53 | 11.11 | 11.11 | 12.70 | 12.70 |

Type T2 Screw Terminals

Available on HDC and HDM type cartridge heaters only

For use with leads, crimp terminals, or bus bars. Includes washers and nuts.

- ➤ Minimum 1/2" unheated section at the lead end is required.
- \triangleright Diameters available: HD -5/8", 3/4", 1"

HDM - 16 mm and 20 mm

> Standard: screw #8-32

Cartridge Heater — High Temperature Termination

Type B Heat Resistant Ceramic Bead Insulation

Available on HDC, HDM, and LDC cartridge heaters.

The ultimate in high temperature lead protection. Allows for the attachment of flexible leads to the heater away from the high heat area. Used when the ambient temperature exceeds 842°F (450°C).

➤ Standard 10" (254 mm) solid nickel pins insulated with ball and socket construction type ceramic beads

Type BL Heat Resistant Ceramic Bead Insulation with LeadsAvailable on HDC, HDM, and LDC cartridge heaters.

High temperature flexible leads are connected away from the high heat area.

➤ Standard 6" (254 mm) solid nickel pins insulated with ball and socket construction type ceramic beads and 10" (254 mm) fiberglass leads rated at 842°F (450°C). Specify longer leads.

Double End Terminations

Cartridge Heater — Double End Terminations

Type T4 Double End Terminal Pin

Available on HDC, HDM, and LDC cartridge heaters

For those applications in which wiring from both ends is an advantage. Various seals are available:

T4A Cement potting seal with silicone varnish

➤ Cement potting temperature rating: 1000°F (538°C)

T4B High temp. moisture resistant epoxy seal

➤ High temp. epoxy temp. rating: 450°F (232°C)

14C Low temp. moisture resistant epoxy seal

- ➤ Low temp. epoxy temp. rating: 266°F (130°C)
- ➤ Minimum 1" unheated section at each end is required.
- > Standard terminal pin length is 2".

Type F1 Double End Flexible Leads

Available on HDC, HDM, and LDC cartridge heaters

For applications in which it is an advantage to wire from both ends. The leads are internally connected and can be bent sharply as they exit the potted ends. Various seals are available:

F1A Fiberglass leads with cement potting seal and silicone varnish

- ➤ Cement potting temperature rating: 1000°F (532°C)
- > Standard lead wire temperature rating: 482°F (250°C)

F1B Teflon® leads with high temp. moisture resistant epoxy seal

- ➤ High temp. epoxy temperature rating: 450°F (232°C)
- > Standard lead wire temperature rating: 392°F (200°C)

F1C Teflon® leads with low temp. moisture resistant epoxy seal

- ➤ Low temp. epoxy temperature rating: 266°F (130°C)
- > Standard lead wire temperature rating: 392°F (200°C)
- ➤ Minimum 1" unheated section at each end is required.
- ➤ Standard 10" leads. Specify longer leads. Leads longer than 60" require a splice.

Type T3 Double End Screw Terminals

Available on HDC, HDM, and LDC cartridge heaters from 1/2" to 1-1/4" diameter

A double ended heater with quick change wiring screw terminals. Includes zinc plated washers and nuts.

➤ Minimum 1/2" unheated section at each end is required.

Standard screw sizes:

- > 1/2" diameter #8-32 × 3/4" screws
- > 5/8" to 1-1/4" diameter #10-32 × 3/4" screws

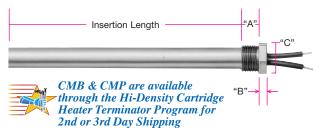

Mounting Fitting Termination & Option

Cartridge Heater Termination — Single Ended National Pipe Thread (NPT) Fitting

TYPE CM Fig. 1 – Fitting Flush with Lead End of Sheath

NOTE: Stainless steel fittings are available through the Terminator program for heaters 1/2" diameter and larger.

Note: Fitting can be offset from end of sheath. See Figure 2, Single Threaded Mounting Options CMV and CMW below.

Standard NPT Bushing Dimensions (Fig. 1 & Fig. 2)

| Heater Diameter (in) | NPT Size | "A" | "B" | "C" |
|----------------------|-------------|------|------|-------|
| 1/4 | 1/8-27 | 3/8 | 3/16 | 7/16 |
| 3/8 | 1/4-18 | 1/2 | 3/16 | 9/16 |
| 1/2 | 3/8-18 | 9/16 | 1/4 | 11/16 |
| 5/8 | 1/2-14 | 5/8 | 1/4 | 7/8 |
| 3/4 | 3/4-14 | 3/4 | 1/4 | 1-1/8 |
| 7/8 | 1-11½ | 3/4 | 1/4 | 1-3/8 |
| 1 | 1-11½ | 3/4 | 1/4 | 1-3/8 |
| 1-1/4 | 11/4-111/2 | 7/8 | 5/16 | 1-3/4 |

Type CM Single Threaded Fitting Mounting Termination Fitting Flush with Lead End of Sheath

Available on HDC, HDM, and LDC cartridge heaters

A single threaded pipe fitting is attached to the end of a cartridge heater to allow for installation into a threaded hole. Brass fittings are silver brazed and stainless steel fittings are heli-arc welded. Available with the potting seals listed in the table.

Potted end seals help to protect the heater from moisture or contamination from plastic material, cleaning solvents, or oils. The bushing cavity can be sealed with various materials such as:

CMA/CMN Low temperature epoxy potting $-266^{\circ}F$ (130°C), UL rated to 194°F (90°C)

Teflon® leads internally connected, rated 392°F (200°C).

CMB/CMP Hi-temp cement potting with silicone varnish — 1000°F (538°C)

Fiberglass leads internally connected, rated 482°F (250°C).

CMC/CMQ Silicone rubber potting — 392°F (200°C) Silicone rubber leads internally connected, rated 392°F (200°C).

CMD/CMR High temperature epoxy potting — 450°F (232°C) Teflon® leads internally connected, rated 392°F (200°C).

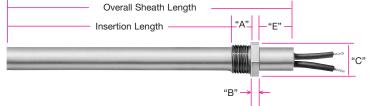

- ➤ A minimum of 1/4" unheated section below the bushing is required.
- > Standard 10" (254 mm) leads. Specify longer leads.

Type Codes for Single Threaded Fittings

| | Fitting Material | | | | | |
|-------------------|------------------|-----------------|--|--|--|--|
| Potting Seal Type | Brass | Stainless Steel | | | | |
| Low Temp Epoxy | CMA | CMN | | | | |
| Hi-Temp Cement | CMB | CMP | | | | |
| Silicone Rubber | CMC | CMQ | | | | |
| Hi-Temp Epoxy | CMD | CMR | | | | |

Single Ended National Pipe Thread (NPT) Fitting Option

TYPE CM Fig. 2 - Fitting Offset from Lead End of Sheath

Type CM Single Threaded Fitting Mounting Option
Fitting Offset from Lead End of Sheath

Available on HDC, HDM, and LDC cartridge heaters

This mounting option available with many terminations attaches a fitting offset from the lead end of the sheath. This option is useful when the lead wires need to be kept away from the heated area. Brass fittings are silver brazed and stainless steel fittings are offset heli-arc welded.

CMV Brass Fitting

CMW Stainless Steel Fitting

- > Specify offset dimension "E" when ordering.
- > A termination must be specified separately.

Hi-Density Cartridge Immersion Heater Specifically Designed for Heating Water & Other Liquids

See Page 2-23.

Mounting Fitting Terminations

Cartridge Heater — Double Ended National Pipe Thread (NPT)

Type CN Double Threaded Fitting Mounting Termination Fitting Flush with Lead End of Sheath

Available on HDC, HDM, and LDC cartridge heaters

A double threaded pipe fitting is attached to the end of a cartridge heater to allow for installation into a threaded hole. Brass fittings are silver brazed and stainless steel fittings are heli-arc welded.

Standard NPT Bushing Dimensions

| Cumulation is a desiring a minority of the | | | | | | | | | |
|--|-------------|------|------|-------|--|--|--|--|--|
| Heater Diameter (in) | NPT Size | "A" | "B" | "C" | | | | | |
| 1/4 | 1/8-27 | 3/8 | 1/4 | 7/16 | | | | | |
| 3/8 | 1/4-18 | 1/2 | 1/4 | 9/16 | | | | | |
| 1/2 | 3/8-18 | 9/16 | 1/4 | 11/16 | | | | | |

Type Codes for Double Threaded Fittings

| | Fitting Material | | | | |
|-------------------|------------------|-----------------|--|--|--|
| Potting Seal Type | Brass | Stainless Steel | | | |
| Low Temp Epoxy | CNA | CNN | | | |
| Hi-Temp Cement | CNB | CNP | | | |
| Silicone Rubber | CNC | CNQ | | | |
| Hi-Temp Epoxy | CND | CNR | | | |

Potted end seals help to protect the heater from moisture or contamination from plastic material, cleaning solvents, or oils. The bushing cavity can be sealed with various materials such as:

CNA/CNN Low temperature epoxy potting — 266°F (130°C), UL rated to 194°F (90°C)

Teflon® leads internally connected, rated 392°F (200°C).

CNB/CNP Hi-temp cement potting w/ silicone varnish — 1000°F (538°C)
Fiberglass leads internally connected, rated 482°F (250°C).

CNC/CNQ Silicone rubber potting — 392°F (200°C) Silicone rubber leads internally connected, rated 392°F (200°C).

CND/CNR High temperature epoxy potting — 450°F (232°C) Teflon® leads internally connected, rated 392°F (200°C).

- ➤ A minimum of 1/4" unheated section below the bushing is required.
- > Standard 10" (254 mm) leads. Specify longer leads.

Cartridge Heater Immersion Heater Top Hat Screw Plug Termination

Type TH Top Hat Screw Plug

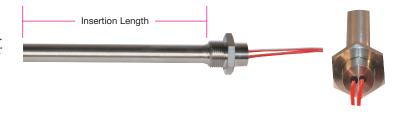

Available on HDC (except 1/8") and HDM cartridge heaters

This heater has a header cap as an integral part of the fitting. Leads exit through small holes which are sealed with epoxy for moisture protection.

Low temperature epoxy potting — 266°F (130°C), UL rated to 194°F (90°C)

Teflon[®] leads internally connected, rated 392°F (200°C).

➤ Standard 10" (254 mm) leads. Specify longer leads.

Cartridge Heater — Bulkhead Fitting Termination

Type BF Bulkhead Fitting

Available on HDC and LDC 1/2" and 5/8" cartridge heaters

A 5/8-18 UNF fitting is attached to the end of the cartridge heater to allow for mounting the heater to the wall of a tank or enclosure. Brass fittings are silver brazed and stainless steel fittings are heli-arc welded. Includes a copper washer and jam nut. The lead wires are internally connected. Available with the potting seals listed in the table.

Type Codes for Bulkhead Fittings

| | Fitting Material | | | | |
|-------------------|------------------|-----------------|--|--|--|
| Potting Seal Type | Brass | Stainless Steel | | | |
| Low Temp Epoxy | BFA | BFJ | | | |
| Silicone Rubber | BFB | BFK | | | |
| Hi-Temp Epoxy | BFC | BFL | | | |

Potted end seals help to protect the heater from moisture or contamination from plastic material, cleaning solvents, or oils. The fitting cavity can be sealed with various materials such as:

BFA/BFJ Low temperature epoxy potting — 266°F (130°C), UL rated to 194°F (90°C)
Teflon® leads internally connected, rated 392°F (200°C).

BFB/BFK Silicone rubber potting — 450°F (232°C) Silicone rubber leads internally connected, rated 392°F (200°C).

BFC/BFL High temperature epoxy potting — 450°F (232°C) Teflon® leads internally connected, rated 392°F (200°C).

- A minimum of 1/4" unheated section below the bushing is required.
- > Standard 10" (254 mm) leads. Specify longer leads.

Options

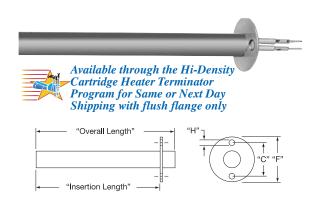

Cartridge Heater Mounting Flange Options

Type MFR Mounting Flange — Round

Available on HDC, HDM, and LDC cartridge heaters

Recommended for applications where excessive vibration exists and may cause the heater to back out of its mounting hole. The 16 ga. 304 SS flange is used as a means of securing the cartridge heater in place.

The default position of the flange is flush with the lead end. Specify the position of the flange when ordering.

Standard Round Mounting Flanges

| Ctandard Hodna Wounting Flanges | | | | | | | | | | |
|---------------------------------|-------|-------|-------|-------|------|------|--|--|--|--|
| Heater Diameter | "F" | | "C" | | "H" | | | | | |
| in (mm) | in | mm | in | mm | in | mm | | | | |
| 1/4 (6.35), 5/16 (7.94), | | | | | | | | | | |
| 3/8 (9.53), 1/2 (12.70), | 1-1/2 | 38.10 | 1-1/8 | 28.57 | .156 | 3.97 | | | | |
| 5/8 (15.88), 3/4 (19.05) | | | | | | | | | | |
| 7/8 (22.23), 1 (25.40), | 2 | 50.80 | 1-5/8 | 41.28 | 203 | 5.16 | | | | |
| 1-1/4 (31.80) | | 20.00 | 1 5/0 | 11.20 | .200 | 5.10 | | | | |

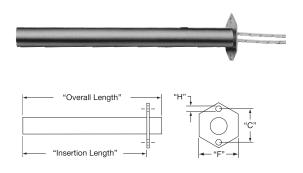

Note: 5/16" dia. cartridge heater can only be HDC; 7/8" and 1-1/4" can only be LDC.

Type MFH Mounting Flange — Hex

Available on HDC, HDM, and LDC cartridge heaters

A hex shape allows the possibility of using a wrench when removal is tight. The 16 ga. 304 SS flange is used as a means of securing the cartridge heater in place.

The default position of the flange is flush with the lead end. Specify the position of the flange when ordering.

Custom Mounting Flanges available upon request. Consult Tempco with your requirements.

Cartridge Heater Lead Wire with Strain Relief Options

Type S3 Lead Wire Strain Relief

Available on HDC, HDM, and LDC cartridge heaters

Strain relief clip for leads subject to tension and stress. A "T" type strain relief is silver brazed to the sheath.

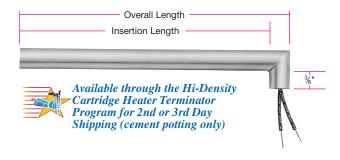

Type S4 Right-Angle Lead Wire Strain ReliefAvailable on HDC, HDM, and LDC cartridge heaters

Strain relief clip for leads subject to tension and stress. A "T" type strain relief is silver brazed to the sheath and bent at a 90° angle.

Sheath Options

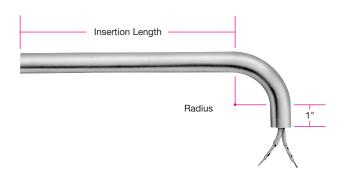

Cartridge Heater Option — Angled Sheath

Type R3 Angled Sheath Extension

Available on HDC, HDM, and LDC cartridge heaters

The sheath extension is welded to the cartridge at a 90° angle. The standard sheath extension is 3/8" long. Specify when ordering if a longer sheath extension is required. If abrasion resistance is required, armor cable or stainless steel wire braid can be attached to the sheath extension. Available with various lead wire types and potted end seals.

Type R4 Bent Cartridge

Available on HDC and HDM cartridge heaters

The heater sheath itself is bent to 90°. The bend is through a required unheated section. The standard sheath extension past the bend is 1". Specify when ordering if a longer sheath is required.

| Cartridge Dia. | in | 1/4 | 3/8 | 1/2 | 5/8 | 3/4 | 1 |

Other Sheath Options

Cartridge Heater Locating Ring

Overall Length Insertion Length

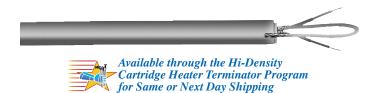

Type LR Locating Ring

Available on HDC, HDM, and LDC cartridge heaters

A locating ring can be attached to the heater to aid in positioning the heater for the application.

The default position of the ring is 1/4" from the lead end. Specify the position of the ring when ordering.

Cartridge Heater Pull Strap

Type PS Pull Strap

Available on HDC, HDM, and LDC cartridge heaters

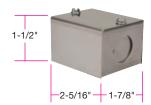

A nickel wire rope is silver brazed to the lead end of the cartridge heater sheath to assist in removing the heater.

Enclosure Options

Cartridge Heater Terminal Box Options

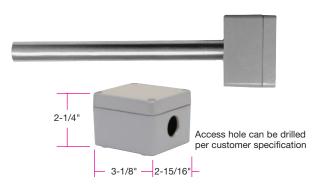

Type E1 General Purpose Terminal Box

Available on HDC, HDM, and LDC cartridge heaters

General purpose Stainless Steel NEMA 1 electrical enclosure designed to provide protection from electrical shock. The boxes have a 5/8" conduit knockout and are welded or brazed to the cartridge sheath.

> A termination must be specified separately.

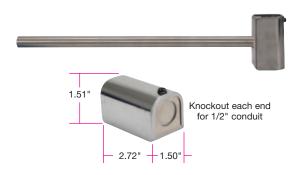

Type E2 Moisture Proof Terminal Box

Available on HDC, HDM, and LDC cartridge heaters

NEMA 4 aluminum electrical enclosures provide protection from splashing or hose directed water, external condensation and water seepage. The box is mechanically attached to the cartridge sheath.

- ➤ A single 5/8" access hole is standard.
- ➤ A termination must be specified separately.

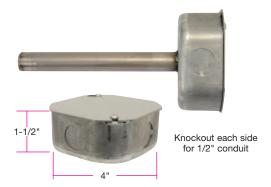

NOTE: Potted End Seal M2C (high temperature epoxy) or M2D (low temperature epoxy) is recommended.

Type E4 General Purpose Terminal Box (mailbox style) Available on HDC, HDM, and LDC cartridge heaters

General purpose Stainless Steel NEMA 1 electrical enclosure designed to provide protection from electrical shock. The box is welded or brazed to the cartridge sheath.

> A termination must be specified separately.

Type E5 Octagon Terminal Box

Available on HDC, HDM, and LDC cartridge heaters

General purpose steel NEMA 1 electrical enclosure designed to provide protection from electrical shock. The box is welded to the cartridge sheath.

> A termination must be specified separately.

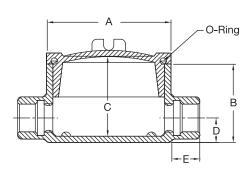

Enclosure Options

Type E3 Explosion Resistant Terminal Box Options

Available on HDC and HDM cartridge heaters 1/2" diameter and larger.

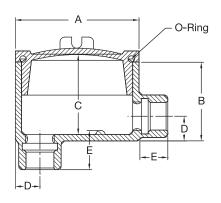

NEMA 4/7 electrical enclosures provide protection from contaminants, moisture, and hazardous conditions. These housings are screwed onto a heater with a single or double ended Brass or Stainless Steel fitting.

- ➤ A threaded fitting mounting termination must be specified. See pages 2-50 and 2-51.
- > Other terminal box configurations available upon request.

Explosion resistant terminal housings are intended to provide containment of an explosion in the enclosure only. No portion of the heater assembly outside the enclosure is covered under this NEMA rating. Abnormal use of a heater which results in excessive temperature can create hazardous conditions such as a fire. Never perform any type of service nor remove the housing cover prior to disconnecting all electrical power to the heater.

Lead Wire Options

Cartridge Heater Options — Lead End Connections

Type RT Ring Terminal

Type ST Spade Terminal

Type QTA 1/4" Female Straight Quick Disconnect

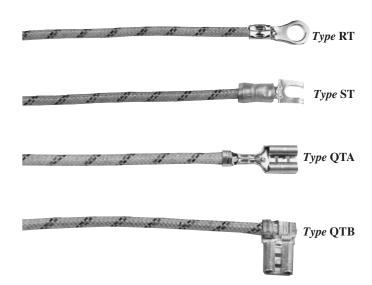

Type QTB 1/4" Female Right-Angle Quick Disconnect

Available on HDC, HDM and LDC cartridge heaters

Various types of crimp terminals can be attached to the heater leads to make wiring into applications quick and easy. Non-insulated and insulated with nylon (221°F/105°C) or PVC (194°F/90°C).

Note: Specify insulation type and ring size (#6, #8, or #10) when ordering. Standard is a non-insulated #10 terminal. Consult Tempco with your requirements.

Type P Quick Disconnect Plugs

Available on HDC, HDM, and LDC cartridge heaters

Allows for the quick and easy replacement of the heater. The plug can be attached to galvanized armor cable, stainless steel armor cable, or wire braid.

Plug Type

Description

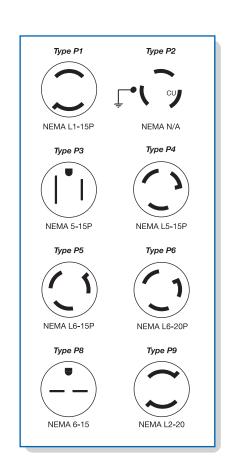

- 1 2-pole/2-wire twist locking plug, 15 amp 125 volt NEMA L1-15P (Part Number EHD-102-102)
- 2 2-pole/3-wire twist locking plug, 15 amp 125 volt or 10 amp 250 volt NEMA N/A. (Part Number EHD-102-107)

NOTE: This plug is not listed by UL, and is recommended for replacement use only.

- 3 2-pole/3-wire straight blade plug, 15 amp 125 volt NEMA 5-15P (Part Number EHD-102-103)
- 4 2-pole/3-wire twist locking plug, 15 amp 125 volt NEMA L5-15P (Part Number EHD-102-113)
- 5 2-pole/3-wire twist locking plug, 15 amp 250 volt NEMA L6-15P (Part Number EHD-102-121)
- 6 2-pole/3-wire twist locking plug, 20 amp 250 volt NEMA L6-20P (Part Number EHD-102-122)
- 8 2-pole/3-wire straight blade plug, 15 amp 250 volt NEMA 6-15P (Part Number EHD-102-114)
- 2-pole/3-wire twist locking plug, 20 amp 250 volt NEMA L2-20P (Part Number EHD-102-104)
 NOTE: For other types of plugs, consult Tempco or specify the manufacturer's part number when ordering. See page 15-15 for additional information.

Caution! Voltage and Amperage ratings of heater and plug must match.

Options

Cartridge Heater Lead Wire Options

Type MIL High Temperature Lead Wire

Available on HDC, HDM and LDC cartridge heaters

When required, high temperature lead wire can be used on most cartridge heaters. The stranded wire is insulated with mica tapes and then a treated fiberglass overbraid.

➤ Maximum temperature rating: 450°C (842°F)

Type TL Teflon® Leads

Available on HDC and HDM cartridge heaters

➤ Maximum temperature rating: 200°C (392°F)

Type HA Heat Shrink Covered Armor Cables

Available on HDC, HDM and LDC cartridge heaters

➤ Either the galvanized or stainless steel armor cable can be covered with moisture proof heat shrink Polyolefin tubing.

Type HTL Very High Temperature Lead Wire

Available on HDC, HDM and LDC cartridge heaters

When required, high temperature lead wire can be used on most cartridge heaters. The stranded wire is insulated with mica composite and then a treated fiberglass overbraid.

- Available wire gauge sizes: 10-18
- ➤ Maximum temperature rating: 550°C (1022°F)

Type FS Uncoated Fiberglass Sleeving

Available on HDC, HDM and LDC cartridge heaters

For effective thermal and mechanical protection, the lead wires can be covered with uncoated fiberglass sleeving.

FSA Uncoated Fiberglass sleeving on each lead separately

FSB Uncoated Fiberglass sleeving on both leads together

- > Specify length when ordering.
- ➤ Maximum temperature rating: 1112°F (600°C)

Type SR Silicone Rubber Coated Fiberglass Sleeving

Available on HDC, HDM and LDC cartridge heaters

For added protection, strength, and resistance to various chemicals, the lead wires can be covered with silicone rubber sleeving.

- **SRA** Silicone rubber coated fiberglass sleeving on each lead separately
- **SRB** Silicone rubber coated fiberglass sleeving on both leads together
- > Specify length when ordering.
- ➤ Maximum temperature rating: 200°C (392°F)

Consult Tempco with your requirements. We welcome your inquiries.

Cartridge Heater Options — Sheath Surface and Sheath Material

Type IS Incoloy® Sheath

Available on HDC and HDM cartridge heaters.

The standard sheath material for all Hi-Density Cartridge Heaters except 1" diameter is 321 stainless steel; standard for 1" diameter is 304 stainless steel. The incoloy sheath option is available on all diameters except 1/8", 5/16", 8 mm and 20 mm.

To assist you in selecting the proper sheath material, corrosion resistant ratings and chemical properties of various heater sheath materials are given in Section 16, Engineering Data, in the back of this catalog.

Type DSM Other Special Sheath Materials

If your application requires a specific alloy sheath material other than described in Type IS above, consult Tempco with your requirements.

Type PAS Passivation

Available on HDC, HDM, and LDC cartridge heaters.

Passivating is a chemical process accomplished by dipping the heater in a solution of nitric acid. The process removes surface contamination, usually iron, so that the optimum corrosion resistance of the stainless steel is maintained.

Type OAL Special Length Tolerance

Available on HDC, HDM, and LDC cartridge heaters.

If a special length tolerance different than the standard length tolerance specified on page 2-4 is required, consult Tempco with your requirements.

Type ELP Electro-Polish

Available on HDC, HDM, and LDC cartridge heaters.

Electro-Polishing is an electro-chemical process that removes surface imperfections and contaminants, enhancing the corrosion resisting ability of the heater sheath.

Type CG Centerless Grinding

Available on HDC and HDM cartridge heaters.

For applications requiring high precision fit and tolerance, the sheath can be centerless ground.

Tolerance: ± 0.0005 inches (0.013 mm)

Specify diameter when ordering.

Type SDA End Disc Seals Silver Brazed Type SDB End Disc Seals Heli-Arc Welded

Available on LDC cartridge heaters.

End discs on HDC and HDM cartridge heaters are heli-arc welded as standard.

The normally mechanically attached end discs on LD cartridge heaters can be silver brazed or heli-arc welded if desired.

Thermocouple Options

Cartridge Heater With Built-In Internal Thermocouples

Built-in Internal Thermocouples are available on all HDC, HDM, and LDC cartridge heater diameters except for 3/16", 5/16" and 8 mm.

Notes: Type TJ4 and TK4 are not available on 1/4" and 6.5 mm diameter cartridges.

Minimum sheath length: 3" for 1/4", 3/8" and 1/2" diameter. 4" for 5/8" and 3/4" diameter.

10" leads are standard for both heater and thermocouple. Leads are internally connected. Specify longer leads.

| Type TJ1 | and T | K 1 |
|----------|-------|------------|

Type TJ2 and TK2

Type TJ3 and TK3

Type TJ4 and TK4

Type TJ5 and TK5

| ANSI | Conductor C | haracteristics | Temperature Range | | |
|------|------------------------|---------------------------|-------------------|-------------|--|
| Code | Positive | Negative | °F | °C | |
| J | Iron (Magnetic) | Constantan (Non-Magnetic) | 0 to 1400 | -17 to 760 | |
| K | Chromel (Non-Magnetic) | Alumel (Magnetic) | 0 to 2300 | -17 to 1260 | |

For other thermocouple types consult Tempco.

Type TJ1 and TK1 Grounded at Disc End

The thermocouple junction is grounded to the sheath at the disc end and packed with MgO. The concave end disc is filled with silver solder and ground flat. When inserted into a flat end blind hole, it will provide fast responsive temperature readings. Widely used in Hot Runner mold probes.

TJ1 Type J thermocouple; **TK1** Type K thermocouple

Type TJ2 and TK2 Ungrounded at Disc End

The thermocouple junction is ungrounded, located at the end of the heater section, 1/8" behind the end disc and packed with MgO. Only provides reference temperature reading of the part being heated – slower response.

TJ2 Type J thermocouple; **TK2** Type K thermocouple

Type TJ3 and TK3 Ungrounded at Center

The thermocouple junction is ungrounded and is located in the center of the length and diameter of the cartridge heater. It provides internal temperature readings of the heater core. Generally used for research applications and is not recommended for controlling process temperatures.

TJ3 Type J thermocouple; **TK3** Type K thermocouple

Type TJ4 and TK4 Grounded at Center

The thermocouple junction is grounded to the sheath in a 1/2" unheated section located in the center of the cartridge length unless otherwise specified. It provides good temperature readings with quick response.

TJ4 Type J thermocouple; **TK4** Type K thermocouple

Type TJ5 and TK5 Grounded at Lead End

The thermocouple junction is grounded to the sheath at the lead end. A minimum of 3/8" of cold section is required. It provides good temperature readings with quick response.

TJ5 Type J thermocouple; **TK5** Type K thermocouple

Note: For a complete selection of standard Hi-Density Pennybottom[™] Cartridge Heaters, with built-in Type J thermocouple for Hot Runner plastic molds, see pages 2-24 through 2-26.

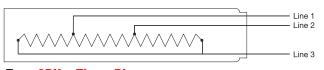

Available from stock.

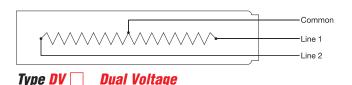

Power Variations

Cartridge Heater Options — Internal Power Variations

Type DW Distributed Wattage

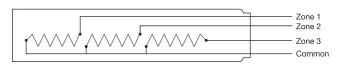

Type 3PH Three Phase

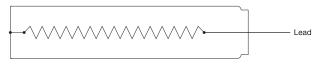

Type DWV Dual Circuits

Type MHZ Multiple Heat Zones (3-Zones Maximum)

Type GJ Grounded Element Winding

Type GL Ground Lead/Sheath

Available on HDC and HDM cartridge heaters

Cartridge heaters can be designed to vary the wattage along the length of the heater. Specify number of zones and the required watts and length per zone starting from the disk end. Leads can be connected externally or internally. Picture shows a heater with Type N externally connected leads. Heaters with other terminations may require a longer cold section at the lead end.

Available on HDC, HDM, and LDC cartridge heaters 1/2" diameter and larger (See page 2-4)

In order to minimize the gauge of the wiring on high wattage cartridge heaters, 3-phase elements can be designed.

Available on HDC, HDM, and LDC cartridge heaters 3/8" diameter and larger (See page 2-4)

3/8" and 1/2" diameter heaters may require a larger diameter transition area at lead end.

Cartridge heaters can be designed using 3-wire series/parallel circuits for dual voltage applications. Whether the heater is run on the high or low voltage, the wattage will be the same.

DV1 120/240 volts **DV2** 240/480 volts

Available on HDC, HDM, and LDC cartridge heaters 1/2" diameter and larger (See page 2-4)

Independent resistance elements can be designed in a single cartridge heater for added versatility.

Available on HDC and HDM cartridge heaters 3/8" diameter and larger (See page 2-4)

3/8" and 1/2" diameter heaters may require a larger diameter transition area at lead end.

Multiple independently operated sections of the heater with a common wiring connection can be designed for increased flexibility.

Available on HDC, HDM, and LDC cartridge heaters

For DC applications where the electrical circuit is negative grounded, the cartridge heater can be designed with one side of the element winding grounded to the sheath and a single lead wire exiting the cartridge heater.

Available on HDC, HDM, and LDC cartridge heaters

For those applications requiring a separate ground lead attached to the cartridge heater sheath.

Standard ground lead wire is a 10" long insulated stranded conductor. Optional insulated and color coded leads are available.

Options

Cartridge Heater Internal Sensor and Control Options

Type TF Thermal Fuses

Available on HDC, HDM, and LDC cartridge heaters 1/2" diameter and larger

Thermal fuses can be built into cartridge heaters to act as a high limit for the heater in applications where the temperature must be limited to avoid dangerous situations. When the trigger point is reached, the thermal fuse will open, cutting the electrical current to the cartridge heater. Once the thermal fuse opens, it cannot be reset. Many different trigger temperatures are available.

Type TS Thermostat

Available on HDC, HDM, and LDC cartridge heaters 5/8" diameter or larger

Cartridge heaters with built-in thermostats are very efficient and economical for heating and controlling temperatures. Available with NPT or special type mounting fittings, they provide a self-contained heater mainly recommended for immersion applications. They can also be used as over-temperature safety devices. The thermostats are factory preset for the trip temperature; therefore, prototyping and testing is required to determine the exact fixed setpoint. Maximum temperature—302°F (150°C). Maximum Amps—8@120 Volts.

A minimum 2-1/2" cold section is required to house the thermostat. Consult Tempco with your requirements.

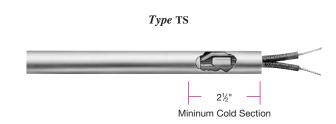

Type TM Thermistor

Type RD RTD Temperature Sensors

Available on HDC, HDM, and LDC cartridge heaters

Tempco has the ability to custom design cartridge heaters with built-in temperature sensors such as thermistors and RTDs. For specific applications that have a limited or single set point range, thermistors or RTDs in conjunction with simple electronic controllers can be an economical choice.

NOTE: For thermocouples see page 2-58.

Cartridge Heater Option — Inspection Services and Test Reports

Standard Electrical Tests and Optional Test Reports

- **1.** Resistance test measures ohms at room temperature.
- **2.** IR (insulation resistance) test measures the insulation resistance to the flow of current. Standard test is done at 500VDC.
- **3.** Hipot (high potential) test a high voltage is applied between a product's current carrying conductors and its metallic enclosure to verify that the insulation is sufficient to protect the operator from electrical shock.
- **4.** Leakage current test measures the current that flows from any conductive part to ground.
- **5.** Heaters can be serialized and test reports can be sent with each shipment if required. Contact Tempco with your requirements.

Optional Die Penetrant Test

This non-destructive testing can detect imperfections in weld joints. For critical applications, each individual heater's weld joints by end cap and fittings can be tested. Certified test reports will be sent with each shipment. Consult Tempco for details.

Optional Hydrostatic Pressure Test

Cartridge heaters with attached pipe fittings can be pressure tested to your specifications at Tempco. Our in-house testing capabilities can ensure that your products meet your exact specifications. Contact Tempco with your requirements.

LDA and HAC Forced Air In-Line Process Cartridge Heaters

TEMPCO manufactures a variety of Air Process Cartridge Heaters. They can be standard units or designed to the customer's specifications. The following diameter sizes are available: 3/8", 1/2", 5/8" and 3/4".

These diameters can be adapted with various types of fittings and made into any practical length.
